# VAULT CONNECT

VaultConnect™ allows users to connect safes, vaults, and offline cash with other cash and transaction-related data, while also producing and managing tills for start and end-of-day operations. Deposit and withdrawal information for vaults can be entered into any PayComplete™ enabled device, be it a Windows 10 PC, smart safe, cash recycler, or other Windows device. Vault data is then available to be viewed in the same way as recycler and smart safe data, clarifying cash positions across units and locations and maximizing the productivity of cash by supporting the daily operations of the business. No heavy investment or new hardware required.

## WITH VAULTCONNECT, YOU TRADE DISCONNECTED VAULTS AND OFFLINE STORAGE FOR:

### CASH ACCOUNTABILITY

- No more trying to manage cash levels using spreadsheets, paper notes, or memory

- Cash moving in and out of vaults is tracked and accounted for

- Connect vault cash with POS ensuring all in-store cash is in balance

### CASH EFFICIENCY

- Employees know exactly how much and what mix of cash they need to start their shift

- Virtual recycling functions with no investment in hardware

- Optimize frontline cash and treasury activities through a more precise understanding of cash flows

### CASH VISIBILITY

- Unlock cash info from offline safes and vaults and forecast cash data with confidence
