

# Accessories for ICX Active-9

The Ultimate Coin Handling System

Small and Flexible System with Minimal  
Footprint that Captures, Stores and Transports Coins

# Flexible Cash Handling

## Explore Flexible Cash Handling

The ICX Active-9 is the strongest mid-range sorter on the market. It is designed for processing 250,000 coins per shift. Besides the flexibility of Active Sorting, this coin sorter offers multiple accessories enabling a solution that meets your unique business needs.

### Accessory Overview

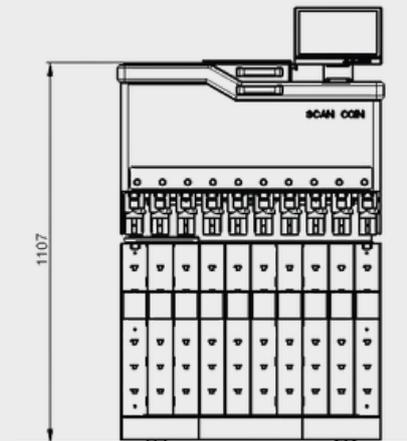

- 01.** Floor stand on wheels, with bag support
- 02.** Floor stand with adjustable height
- 03.** Coin Handling System, CHS-9
- 04.** Coin Lifts (One option for fixed hopper and one coin lift for the SC-93400 coin wagon)
- 05.** Automatic Coin Feeder
- 06.** Reject cup with lid
- 07.** Direct Disc Chute
- 08.** Connection kit to the Coin Wagon System, SC-93770
- 09.** Printer

ICX Active-9  
with a CHS  
system

## 1 Floor Stand with Bag Support

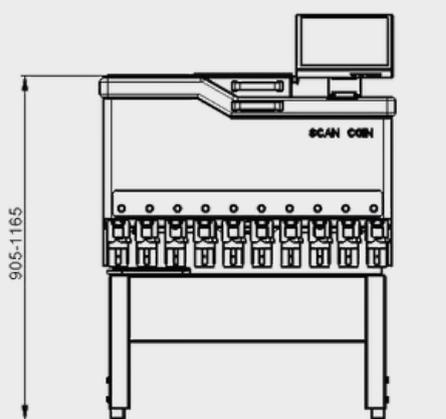

The floor stand with bag support is a compact solution. The standing height makes the ICX Active-9 easy to operate while the bags are always in their right positions. Furthermore, the wheels make the ICX Active-9 easy to move.

Part no. 5004449-000 Floor stand with bag support, ICX

## 2 Floor Stand with Adjustable Height

Operators can adjust the stand height according to their needs. It is designed to perfectly fit the ICX Active-9 where no additional space is required. Built with robust steel ensures the stand lasts year after year along with the ICX Active-9. This floor stand does not include any bag support. Could be used to lower the ICX when automatic coin feeder is used to maintain perfect work height.

Part no. 011-009885-000 Floor stand , ICX

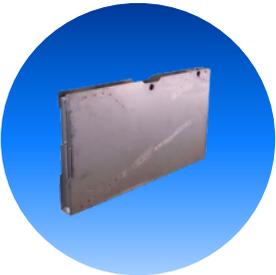

**3 Coin Handling System, CHS-9**

The Coin Handling System, CHS-9, stores sorted coins in specific metal cassettes for each denomination. The new robust system is easy and efficient, making it a cost effective solution with easy integration. It facilitates storing and transporting coins for small to medium sized businesses. Its small footprint and simple design makes it a compact and practical solution without compromising the ergonomics. It is compatible with other SCAN COIN cash handling equipment and accessories.

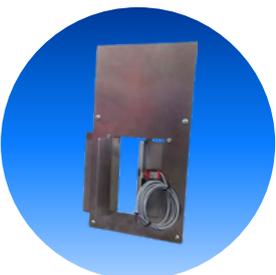

**Parking Station for Cassettes**

The Parking Station is used for holding the cassettes in place under the ICX Active-9. The parking station can be placed upon a transport pallet for easy storage when not in use. The rolls are positioned with a slight inclination towards the rear, so the cassette is held in place by its own weight. It has steel rolls and adjustable feet.

**Cassette for Coins**

Specially designed cassette with noise dampeners and sliding-door. Fully compatible with the SCAN COIN Lift with adapter plate.

**Adapter Plate for Coin Lifts**

This is a self-adjusting docking plate with guide plates for easy docking of the cassettes to a SCAN COIN lift. Safety switch detects presence of cassette and the Coin Lift will not start without it. This accessory is compatible with all existing models from the 3365 series.

**Trolley for Cassette**

The Trolley is used to transport the cassette to the Parking Station or the Coin Lift. An indexing plunger holds the cassette in place while moving around, thanks to the high friction wheels. Also, the cassette has rear stop and steel rolls for easy maneuvering. The casters are fixed in the front, while there are swivel casters with total lock in the rear of the wagon, which stabilizes the position next to the coin lift.

**Part Numbers**

**011-009700-000** CHS-9, Set, 1 Parking Station, 1 trolley, 1 adapter and 9 cassettes

**011-009355-001** CHS-9, Parking Station

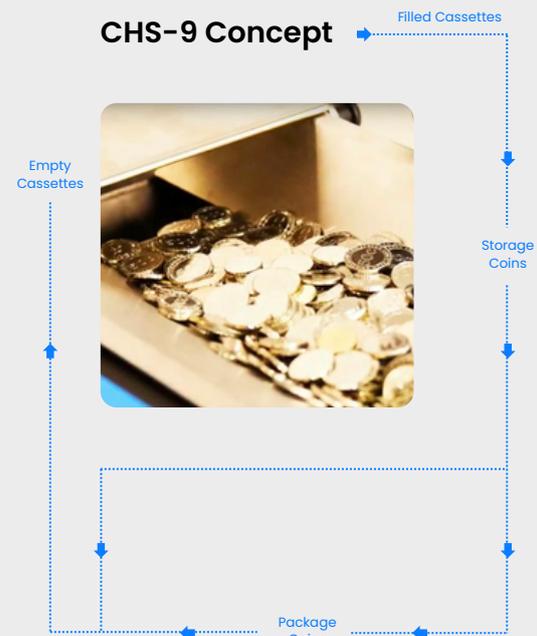

**011-009340-001** CHS-9, Cassette

**011-009356-001** CHS-9, Trolley

**011-009555-000** CHS-9, Sortorex kit (Table, funnel)

**011-009554-000** CHS-9, ICX Active-9 kit (Table, funnel)

**CHS-9 Concept**

## 4 Coin Lifts

The coin lift automatically transports coins into the ICX Active-9 for maximum efficiency. We offer several kits based on the models below. The coin lifts available are, per default, prepared with either a fixed hopper (SC-93420, SC-93500) or coin lift for wagons (SC-99365), used with the indoor coin wagon (SC-93400). or the outdoor coin wagon (SC-99360).

### Flexible Solution

Below you see the lifts with a fixed hopper in two different versions depending on needed amount of stored coins, as well as the lift with a coin wagon.

The flexible coin lift can be positioned on both sides of the ICX Active-9. Also, it can be connected to the Conveyor System SC-93770 (see following pages).

No matter how this lift is positioned, the construction assures the ICX Active-9 is accessible for service maintenance.

### Part no. and specifications

**Kit 1 (011-009859-001):** Coin lift kit - SC-93365, chute, plastic chute

**Kit 2 (011-009859-002):** Coin lift kit - SC-93420, chute, plastic chute

**Kit 3 (011-009859-003):** Coin lift kit - SC-93365, chute, plastic chute, DK-steel chute, 2x speed

**Kit 4 (011-009859-004):** Coin lift kit - SC-93500, chute, plastic chute

**Kit 5 (011-009859-005):** Coin lift kit - SC-93420, chute, plastic chute, 220V 60Hz

**Kit 6 (011-009859-006):** Coin lift kit - SC-93365, chute, plastic chute, inlet steel chute and electrical box for 5299

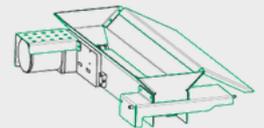

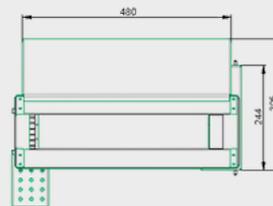

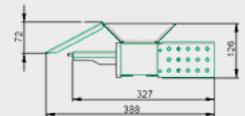

**Packaging (011-000999-088):** Packaging - SC-93420 kit

**Packaging (011-000999-025):** Packaging - SC-93365 kit

**Packaging (011-000999-015):** Packaging - SC-93500 kit

**5 Automatic Coin Feeder**

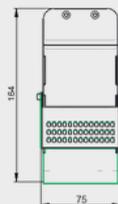

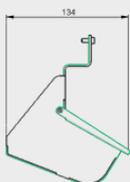

The automatic coin feeder improves the efficiency of coin flow while reducing the operator's workload. Now there is no need to lift the standard coin chute as the coins are automatically transported into the ICX Active-9. This reduces the need for repeated heavy lifting and makes managing the machine less labour intensive for the operator. The feeding is controlled by a level sensor. Finally, you also gain one extra litre of coin volume, further increasing the efficiency of the coin sorting process. The coin feeder takes in total 4.5 litres of coins.

**Part no.**  
 011-009884-000 Coin feeder  
 011-009884-001 Coin feeder, high torque gas strut  
 011-009884-100 Coin feeder, 110V 60Hz

**6 Reject Cup with Lid**

The external reject cup easily and automatically accepts rejected coins. The added benefit of having this feature included with the ICX Active-9 is that the reject cup can be removed while the machine is running - eliminating the need to stop the machine. The top cover can also be removed. It is designed with robust steel and is easy to add to the solution.

**Part no.**  
 011-009735-000 Reject cup with lid

## 7 Direct Disc Chute

The direct disc chute is an accessory designed to increase the speed of processing smaller coin deposits. After a minor adjustment and mounting of the chute on the top of the ICX Active-9, a maximum of 200 coins can be fed directly onto the sorting disc, significantly reducing the time for the coin sorting procedure.

**Part no.**

011-009861-000 ICX direct disc chute

## Connection kit to the Coin Wagon System, SC-93770

The conveyor system handles medium to large quantities of coins after they have been sorted by the strong ICX Active-9. Each sorted denomination is automatically transported to its specific coin wagon. It is possible to customize the system per your needs or plug and play with an already existing coin wagon system.

### Automatic Solution for Easy Operation and Monitoring

After the coins have been sorted, they fall onto conveyors transporting each denomination to its specific coin wagon. You can choose a system for two, six or eight denominations. Several accessories are included for maximum performance, such as a stand, table, electrical box and tubes.\*

Enhanced Efficiency

Easy operation and monitoring

For large quantities of coins

Increased comfort

#### Included in the connection kit

- Stand
- Table
- Electrical box
- Tubes

*\*Please note that coin wagons need to be ordered separately.*

Part no.  
01011-009912-000 Kit SC-93770

Print cash transactions with the addition of a compatible printer.

Part no.  
5004818-000 External printer

## Features & Benefits

- Low power consumption, low operating cost
- Support Serial+USB+100M Ethernet/Parallel+USB
- USB virtual serial port mode, while supporting OPOS applications
- 100M network interface card for faster connection and printing
- Support high-speed download print, serial print the highest speed upgrade 66%
- Support 2D barcode printing function (optional)
- Recover printing after network disconnection
- Built-in GB18030 Simplified/Traditional Chinese characters library
- Built-in data buffer (data receiving available when printing)
- Ability to enlarge, bold and underline characters, as well as adjust for line spacing and margins
- Built-in WEB, directly through the IE printer configuration
- Support network status monitoring, multi connected computer printing
- Compatible with ESC/POS emulation, characters per line and fonts are optional (adjust by DIP switch)
- Support printer authentication, bound computer software

## Specifications

300mm/s high speed printing

Size 180x139x127mm (LxWxH)

Weight 1.23kg

# Ready to Explore Flexible Cash Handling?

## We can customise your ideal coin processing solution.

The ICX Active-9 is the strongest mid-range sorter. Designed for high-performance, the ICS-Active-9 processes up to 250,000 coins per shift, making it the market-leading mid-range sorter. Its active sorting capabilities, combined with multiple accessory options, allow us to tailor the system to your unique business requirements.

Contact us to explore the right configuration for your operation.
