

ICP ACTIVE-9

Reliable and efficient.
Smart, efficient and tailored
to your business.

The ICP Active-9 is a high-speed, intelligent coin sorting solution designed for demanding cash-handling environments. Built on proven Active Sorting® technology, it delivers maximum throughput, precision sorting, and continuous operation even under heavy workloads. Rugged construction, advanced sensors, and the optional Flex PC software for monitoring, reporting, and advanced coin management make the Active-9 ideal for cash centers, retail back offices, vending routes, gaming operations, and any application where speed, accuracy, and reliability are critical.

Key Features

Active Sorting® Technology

Ensures continuous, high-speed coin sorting without stopping for bag changes, maximizing productivity.

High-Throughput Processing

Processes up to 4,900 coins per minute (depending on currency), keeping operations fast and efficient.

Multiple Sorting Outlets

Nine active outlets plus one reject outlet allow precise sorting for multiple coin denominations and reject handling.

Vacuum Coin Feeding

Reduces jams and ensures smooth coin transport for uninterrupted operation.

Heavy-Duty Construction

Solid cast-iron base and durable materials provide stability, longevity, and reduced vibration during operation.

Flexible Configurations & Software

Available in Standard or Flex PC versions, with optional software for real-time monitoring, reporting, and advanced coin management.

Intuitive Interface

Large, user-friendly display and simple controls make setup, monitoring, and operation straightforward.

Reliable Sensor Control

Advanced sensors detect coins accurately, minimize errors, and maintain consistent sorting performance.

Key Benefits

Maximum Productivity

Process more coins and add new denominations easily with Active Sorting® technology.

Cost-Effective & Reliable

Minimal IT investment and smooth upgrade path from SC Active 4000 ensures long-term value.

Flexible & Adaptable

Standard and Flex versions with optional software deliver unparalleled operational flexibility.

User-Friendly Design

Ergonomic, intuitive controls and a short learning curve make setup, monitoring, and operation effortless.

Technical Specifications

Max Speed	Up to 4,900 coins per minute (varies by currency and coin mix)
Diameter Range	14.0 – 34.0 mm (0.60 – 1.30") (standard)
Thickness Range	0.9 – 4.0 mm (0.04 – 0.16")
Dimensions (WxDxH)	1,132 x 650 x 1,130 mm
Weight	280 Kg

Characteristics

	230V Ratings	110V ratings
Supply Voltage	220 - 240V +/-10	120V +/- 10%
Frequency	50 Hz +/- 3 Hz	60 Hz +/- 3 Hz
Max Rated Current	14 A	20 A
Machine	9 A	15 A
Auxiliaries (PC, LIFT, etc)	5 A	5 A

The ICP is supported by a full range of cash center accessories, providing everything needed for coin sorting and deposit operations.

With the right configuration, a single ICP can efficiently handle up to one million coins per shift, making it a complete solution for high-volume cash management!
