

# ICX ACTIVE-9

Reliable and efficient. High Speed Coin Sorter to boost your business

The ICX Active-9 is a strong and compact active coin sorter designed to deliver exceptional speed, accuracy, and durability for medium-volume coin processing. Built to handle up to 250,000 coins per shift, it provides the advanced functionality of the Active-9 platform while offering the ideal balance between performance and reliability. With flexible Active Sorting technology and a wide range of configurable accessories, the ICX Active-9 adapts to your specific operational needs, making it the ultimate mid-range solution for businesses that demand capability without compromise.

## Key Features

### Active Sorting® Technology

Enables flexible processing of endless variations of mixed coins, tokens, and multi-currency mixes for maximum throughput and efficiency.

### Connectivity & Accessory Support

Includes three USB ports, an Ethernet port, and additional I/O connections for peripherals, networking, and optional accessories.

### Intelligent High-Throughput Processing

Sorts at speeds of up to 2,700 coins per minute, making it ideal for medium-volume coin handling without compromising reliability or accuracy.

### Low Power Consumption & Compact Design

Built for efficient operation with low energy usage, and designed to function as either a standalone unit or desktop solution.

### Nine Coin Outlets + Reject Output

Features nine sorting outlets plus one dedicated reject pocket to handle unwanted or unrecognized coins efficiently.

### Flexible Operation & Setup Options

Supports multiple currency setups and accessories, enabling customization to specific business requirements.

### Large Touchscreen Interface

A 10-inch touchscreen makes setup, monitoring, and denomination configuration easy and intuitive.

### Built for Continuous Operation

Designed to handle up to 250,000 coins per shift, ensuring durable and reliable performance in demanding environments.

## Key Benefits

### High-Performance Efficiency

Processes up to 250,000 coins per shift at high speed, reducing processing time and increasing operational productivity.

### Minimal Downtime

Engineered for durability and accuracy, the ICX Active-9 ensures consistent performance with minimal downtime, even in demanding environments.

### Advanced Sorting Flexibility

Active Sorting® technology enables seamless handling of mixed coins, tokens, and multi-currency volumes, adapting easily to changing business needs.

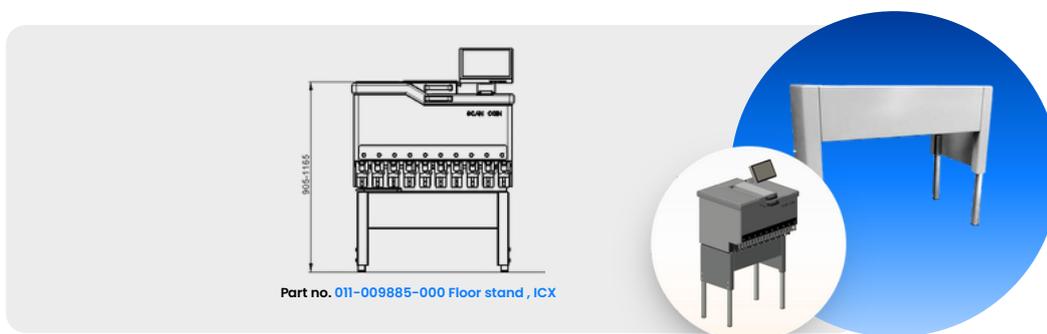

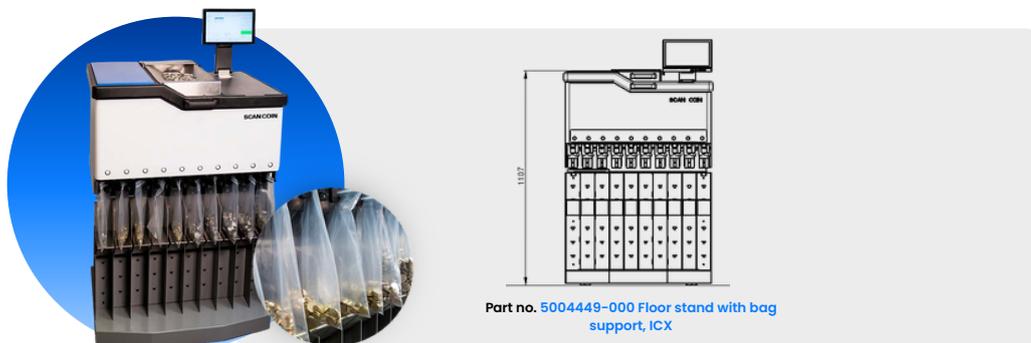

### Scalable to Your Business Needs

With nine sorting outlets, flexible configuration options, and multiple accessory integrations, the system can be tailored to fit your unique workflow and future growth.

## Floor Stand with or without Bag Support & Floor Stand with Adjustable Height
