# Transport**Connect**™

Transport
Connect™

Integrate all points of cash from any provider for any use

TransportConnect™ puts oversight and management on a single pane of glass to unlock the power of unified cash management

Managing cash accurately and efficiently across a distributed transportation network can seem nearly impossible when left to manual efforts and legacy technology. TransportConnect™ streamlines and optimizes all aspects of the process, enabling a new approach to overseeing cash operations. Harnessing the power of the cloud within a fully secure, TransportConnect™ features intuitive user interfaces and the flexibility of robust connections via an open REST API. TransportConnect™ integrates with all PayComplete hardware and compatible third-party ticketing and fare collection machines.

With TransportConnect™, you trade costly and time-consuming cash management for:

More Visibility, Better Decisions

- Define KPIs for transactions, user activity, cash position, device health and more
- Create custom reports and assign automated schedules for delivery to users
- Enable user queries, accessing any data from devices on the system

Faster, More Accurate Validation and Reconciliation

- Automate the process of reconciling net cash position with cash sales, deposits and dispenses
- Compare actual cash with expected amount by integrating with ticketing systems and CIT services
- Conduct reconciliation by driver (or other employee), by location and depot, or organization-wide

Lower Costs and Risk

- Orchestrate the access and movement of cash across the transportation system
- Restrict the amount of cash that can be "out" of the system in each time period
- Block users from additional cash activities until requisite conditions are met

Key Features of TransportConnect™:

Cash systems management
TransportConnect™ makes it possible to remotely configure, update, monitor, troubleshoot and manage all cash, users and machines involved in passenger transactions.

Cash orchestration
Users can monitor and control the access and movement of cash throughout your transportation system with TransportConnect™, setting limits and controls, triggering alerts, and blocking further activity where needed.

Cash reconciliation
TransportConnect™ powers reconciliation of net cash position with cash sales, deposits and dispenses, conducted at the level of individual drivers, depots, or system-wide.

Cash analytics
Rich visualizations of cash-related KPIs can be built using the data in TransportConnect™, using configurable templates and presented at multiple levels and on a schedule or based on ad hoc queries.

The PayComplete Advantage:

Enterprise-caliber platform for large scale cash and device management	Hardware-agnostic: works with PayComplete or third-party devices	Service provider-agnostic: works with any bank or CIT	An integral part of PayComplete's unified transaction solution

Part of the PayComplete Unified Transaction Platform
TransportConnect™ is an integral part of the cash management solution suite within the PayComplete Connect Platform. Our platform unifies reporting and management across all transactional devices, including offline vaults, POS, self-checkout, recyclers. The flexibility of the PayComplete Connect Platform allows for a single IoT cloud-based enterprise layer, thus unifying the management of devices, payments, users and data.
